PROJECTS

CRM Application — Saspro Technologies

Technologies: React Native, JavaScript

- Developed a cross-platform mobile CRM solution to streamline client data management for on-the-go users.
- Implemented secure logic and real-time data tracking, improving workflow efficiency for sales and support teams.

Smart Restaurant Management System (SRMS) — Saspro Technologies

Technologies: MERN Stack, MySQL

- Built a full-stack restaurant management platform covering order management, billing, and inventory tracking.
- Designed a scalable backend architecture to handle real-time order flow and reduce manual processing time.

Weapon Identification and Violence Detection System — Engineering Project

Technologies: Python, Machine Learning, Computer Vision

- Contributed to an AI-powered surveillance solution that analyzes video feeds to flag weapons and violent behavior for public safety and security monitoring.

- Worked on model integration and application logic to support real-time alerting for security personnel.

Client Websites — Zephyr Technologies and Solutions Pvt. Ltd.

Technologies: MERN Stack, Python, PHP, JavaScript, HTML, CSS

- Delivered responsive, SEO-optimized websites for clients in the construction and software industries.
